

Product Designer / UIUX Designer

Product-minded designer with experience across enterprise systems, startups, and international projects.

Professional Summary

Product Designer with strengths in Product Thinking, UI/UX design, and frontend collaboration. Experienced in high-information-density interfaces, complex workflows, and cross-functional collaboration, with the ability to quickly understand unfamiliar domains and reorganize complex systems.

Currently working at Wistron ITS stationed at TSMC, focusing on semiconductor-related internal systems and workflow platforms. Specialized in information architecture, operational efficiency, and enterprise user experience optimization within large-scale environments.

Familiar with Vue.js and React collaboration workflows. Currently developing a personal side project, 'Kodo', while continuously strengthening skills in Workflow Design, SaaS, and AI Product Design.

Core Skills

- Product Thinking
- Enterprise System Design
- Workflow Optimization
- Information Architecture
- Cross-functional Collaboration
- UI/UX Design
- Vue.js / React Collaboration
- Wireframe & Prototype
- Rapid Domain Learning

Work Experience

Wistron ITS (Stationed at TSMC) | UI/UX Designer | 2025 - Present

- Designed semiconductor-related enterprise internal systems with high-information-density interfaces and complex operational workflows.

- Collaborated closely with PMs, engineers, and DevOps teams to align business requirements, technical constraints, and existing workflow logic.
- Analyzed cross-department operational pain points and optimized workflows to improve usability and operational efficiency.
- Quickly learned semiconductor-related domain knowledge through requirement discussions, rapid note-taking, and workflow analysis.

Aimendofu | UI/UX / Product Designer | 2023 - 2025

- Led UI/UX and workflow design for an integrated super-app platform, reorganizing chaotic information architecture and user flows.
- Handled product planning, interface design, and cross-functional coordination in the absence of a dedicated Product Manager.
- Collaborated with Taiwan-based frontend engineers and China-based backend engineers on feature planning and design delivery.
- Participated in Vue.js frontend collaboration and implementation discussions, strengthening design-to-development integration.

Sampras.hk | UI/UX Designer | 2023

- Worked on branding websites and digital platform UI/UX projects with responsive and multilingual design experience.
- Collaborated with PMs, developers, and clients across international projects and remote communication environments.
- Created wireframes, prototypes, and interface flows while building hands-on product design and development collaboration experience.

Side Project

Kodo | Focused on Workflow Design / SaaS / AI Product Experience
